**AREA OF INTERESTS**

My interests and enthusiasm are for **Computer Vision**, **Medical Image Analysis** and **Machine Learning**. I am exploring how to use medical image data and machine learning to help doctors make diagnostic decisions. I am broadly interested in machine learning for improving lesion detection and classification, anatomical structure segmentation and quantification, cancer diagnosis and therapy.

**EDUCATION**

*Honours Bachelor of Science*  
Computer Science, University of Victoria  
**Thesis:** Deep Learning for Computer Vision  
Cumulative GPA: 8.42 / 9.00 or 90.11%

Sept. 2017 – Present  
Victoria, British Columbia, Canada

*Minor degree*  
Electrical Engineering, University of Victoria

May 2018 – Present  
Victoria, British Columbia, Canada

**RESEARCH EXPERIENCE**

*Imagia*

**Research Intern**

- Incoming Applied Research Intern

May 2020 – Aug. 2020  
Montréal, Québec, Canada

*Artificial Intelligence in Medicine Lab, University of British Columbia*

**Research Intern**

- Researched in patch-level and WSI-level classification for epithelial ovarian carcinoma whole-slide pathology images.
- Proposed and implemented deep learning-based multi-scale and transfer learning algorithms to improve patch-level classification accuracy as well as design novel algorithms for slide-level predictions.
- Benchmarked hand-crafted features, deep learning features and their combinations for patch-level classification.
- Evaluated the synthetic patch-level pathology images generated by ProGAN as an augmentation step to improve the performance of CNN for patch-level classification.
- Performed survival analysis using the Cox regression of ovarian cancer patients' survival data.
- Designed and built general deep learning for pathology image classification platform using PyTorch, Docker and Kronos.

Sept. 2019 – Apr. 2020  
Vancouver, British Columbia, Canada

*Visual Computing Group, University of Victoria*

**Research Intern**

- Researched in patch-level tumour segmentation for the liver hepatocellular carcinoma whole-slide pathology images.
- Implemented and applied a CVPR 2019 multi-scale with an adaptive weighting deep learning algorithm for automated patch-level detection and segmentation.
- Developed an unsupervised threshold-based algorithm for segmentation of the tumour area in PET scans as a preprocessing step for image registration.

May 2019 – Aug. 2019  
Victoria, British Columbia, Canada

## PROFESSIONAL EXPERIENCE

*EncoreFX*

Sept. 2018 – Dec. 2018

### Software Developer Intern

Victoria, British Columbia, Canada

- Developed an online Foreign Exchange Trading and Payment platform, EncoreFX Express, using Angular and C# ASP.NET Core framework.
- Created user features and interfaces for facilitating interactions, which involves designing, developing, and testing new Angular components on the front-end, as well as building and updating new RESTful API on the back-end.
- Improved unit testing coverage using Jasmine, developed a Selenium test suite and researched in preventing Cross-Site Request Forgery and Cross-Site Scripting.

*Kinsol*

May 2018 – Aug. 2018

### Software Developer Intern

Victoria, British Columbia, Canada

- Developed responsive chatbot applications using Python Flask framework, JavaScript ES6, jQuery, and Bootstrap.
- Improved Deep Neural Networks through hyper-parameter tuning and regularization for the chatbot team.
- Applied YOLO algorithm for detecting and recognizing various vehicles and pedestrians in Python for the computer vision team.

## PEER-REVIEWED JOURNAL PUBLICATIONS

– 2020

- A. Levine\*, J. Peng\*, D. Farnell, M. Nursey, Y. Wang, J. Naso, C. Ren, H. Farahani, B. Tessier-Cloutier, C. Chen, D. Chiu, A. Talhouk, B. Sheffield, M. Riazzy, P. Ip, C. Parra-Heran, A. Mills, N. Singh, T. Salisbury, J. Lee, T. Salcudean, S. S.M. Jones, D. G. Huntsman, C. B. Gilks, S. Yip, A. Bashashati, **Synthesis of diagnostic quality cancer pathology images**, Science Advances, 2020. (*under review*)

## PEER-REVIEWED CONFERENCE PUBLICATIONS

– 2020

- Y. Wang\*, D. Farnell\*, H. Farahani, M. Nursey, B. Tessier-Cloutier, S. J.M. Jones, D. G. Huntsman, C. Blake Gilks, A. Bashashati, **Classification of Epithelial Ovarian Carcinoma Whole-Slide Pathology Images Using Deep Transfer Learning**, 3<sup>rd</sup> International Conference on Medical Imaging with Deep Learning, Montréal, QC, Canada, 6 – 8 July, 2020. (*accepted*)

## PROJECTS

– 2019

- Y. Wang, C. Ten Have and M. Kennedy, **End-to-End Facial Expression Modifier**, CSC486B Deep Learning for Computer Vision Capstone Project (94% A+), University of Victoria, Spring 2019.
- B. Pattie and Y. Wang, **Segmentation of Overlapping Cervical Cells by Joint Level Set Method**, ECE435 Medical Image Processing Capstone Project (95% A+), University of Victoria, Spring 2019.

## ACTIVITIES

*Waterloo Mathematics Undergraduate Research Conference*

27<sup>th</sup> Sept. 2019 – 30<sup>th</sup> Sept. 2019

Attendee

University of Waterloo, Waterloo, Ontario, Canada

*Undergraduate Research Opportunities Conference*

27<sup>th</sup> Sept. 2018 – 30<sup>th</sup> Sept. 2018

Attendee

University of Waterloo, Waterloo, Ontario, Canada
